

QUALITY INSPECTOR

COMPANY DESCRIPTION

Established in Montreal since 1989, Argon 18 has earned a great reputation in the world of cycling. Led by Olympian and triple Canadian Champion Gervais Rioux, one of the most distinguished North American cyclists of his generation, the manufacturing of all Argon 18 bikes is based on extensive expertise. Their stylish and innovative design is based on maneuverability and aerodynamics, at the heart of human performance, in complete harmony with the morphology of each cyclist. All Argon 18 bikes are manufactured with state-of-the-art technology and designed in Canada. The Argon 18 bike brand is now present in more than 70 countries around the world.

Our team is composed of dynamic and passionate professionals who are always ready to face new challenges

JOB DESCRIPTION

Under the supervision of the Assembly Supervisor and in support of the Quality Director, the Quality Inspector is responsible for ensuring that the company's products meet the required standards. It maintains the Quality standards within the production activities and ensures the reputation of the brand and the delivery times required by the customers. It plays a key role in ensuring greater profitability, as well as managing and increasing innovation within the company.

SPECIFIC RESPONSABILITIES

- Read Quality Control (QC) grids and technical drawings to understand product quality expectations;
- Create QC grid reports of incoming goods in accordance with established criteria and sample charter;
- Perform incoming inspections of products (measuring dimensions, testing functionality, specifications, etc.);
- Perform inspections of outgoing products per criteria found on check lists;
- Accept or reject incoming and outgoing goods;
- Accurately document the results of the inspections and testing;
- Prepare and submit reports;
- Make initial recommendations for possible corrective actions to supervise;
- Participate in the definition and/or revision of Standard Operating Procedures (SOP) for the inspection function;
- Participate in organizing and managing the quarantine location;

- Create a nomenclature regarding non-conformities identified and products under quarantine and other locations;
- Apply rework instructions found in product notices;
- Work with warehouse clerk to organize stock (when and if needed);
- Assist in organizing the warehouse as well as incoming/outgoing workstations;

REQUIRES QUALIFICATIONS

- Relevant experience in manufacturing sector and inspection;
- Ability to read and understand technical drawings;
- Working knowledge of measuring instruments such as caliper and mechanical gauges;
- Impartiality to recognize any difficulties related to the design or process;
- Good visual acuity;
- Oral and written communication in French and English;
- Good mathematical skills;
- Working knowledge of the MS Office suite (Word, Excel, Outlook);
- High school diploma; other qualifications are an asset;
- Flexibility in terms of work schedules based on input / output of products;
- Post 100% on production floor;

REQUIRED SKILLS

- Reliable, autonomous and able to manage time;
- Versatile and responsible;
- Rigorous, organized and attentive to details;
- Analytical mind;
- Proof of judgment;

- Initiative and ability to manage emergencies and priorities;
- Ability to work under pressure with tight deadlines;
- Excellent communication skills;
- Interpersonal and interacting skills with different teams;
- Objectivity and integrity;
- Ability to perform repetitive work;

APPLICATION PROCEDURE
